BE SAFE ON THE INTERNET

Co-funded by the
Erasmus+ Programme
of the European Union

PRESS RELEASE

B-SAFE

Prague, January 2021 – Support of the internet safety is the necessity especially at times of COVID situation. Almost all European people have the internet success, are working on PC, tablets, and smart phones. The knowledge of the internet safety is hot topic not only for adults, but also for young people and even the children. Acquired internet safety knowledge of potential entrepreneurs and employees is a prerequisite for growth and productivity and help to increase the chances for better employability. For this reason, one educational institution, two educational companies and one company specialized in management support in three different areas (Finance, Strategic and Human Resources) from four countries were together cooperating to create an online platform that will provide users with an internet safety by a new and interactive way.

B-SAFE is a two-year project co-funded by the European Union under the Erasmus + program. The aim of project partners from the Czech Republic, Spain, Austria and Portugal was to design and implement the online educational platform B-Safe available at https://lms.project-bsafe.eu/. A modern and interactive platform should be a new didactic tool for young adults, teachers, trainers to learn about web and internet safety. The target groups are mainly young people, but generally everybody, who needs to know information about internet safety. Furthermore, also the teachers and trainers from
 universities and secondary schools, where internet safety could be a part of their curriculum.

Currently, the online platform is already ready for study with learning texts, quizzes, test questions and practical examples. The learning platform consists of 11 units (10 with learning content and 1 checking unit). The pilot testing was realized during January 2021 and we have reached of 109 participants from Czech Republic, Austria, Spain and Portugal. The learning platform was evaluated very well by the users with the small requirements which were considering during final completion.

The project B-SAFE was realized by the Czech educational company bit cz training, s.r.o.
